“With its method of storing internal and external messages in one Microsoft SQL Server database, this solution is a SWEET DREAM.”

## GFI MailArchiver

**Mail Archiving.** Have you started waking up in a sweat with the words *must meet regulatory compliance* echoing in your ears? If so, you'll probably sleep better with an easy and reliable email archiving solution in place. The winner of this year's Best Mail Archiving award is GFI MailArchiver for Exchange. With its

method of storing internal and external messages in one Microsoft SQL Server database (saving as much as 80 percent over personal folder store—PST—storage), this solution is a sweet dream. Users can easily access archived mail through a centralized, Web-based search portal. And you can use GFI MailArchiver for Exchange to enforce corporate policies regarding email content. (For more details about this winning product, see Buyer's Guide, "Exchange Archiving Tools," July 2005, InstantDoc ID 46619.) InstantDoc ID 47264
