

Report title: Successful attempts to access files and registry

Description: The report is based on events 560 and 565 with type success audit. These events show where an object has granted access to a request, such as list, read, create, and delete. The report shows successful attempts to access files or registry and does not include normal system activity. Note that for best results, file auditing is required to be enabled on the files and registry values of interest. Use the report to identify the users using sensitive information.
